

TESTING DOCUMENTATION - COMPLETE OVERVIEW

☒ Everything Created - Here's Your Testing Suite

I've created **7 comprehensive documentation files** with all testing APIs, requests, responses, routes, and required details.

Your Files (All in **c:\RN\PHRMA-PRODUCTION-APP-BACKEND-MAIN**)

```
Testing Documentation Created:
|
|  🚀 README_TESTING_GUIDE.md ..... START HERE (Navigation)
|  ⚡ QUICK_REFERENCE_CARD.md ..... Quick lookup (Print it!)
|  📖 POSTMAN_API_TESTING_GUIDE.md ..... Detailed API reference
|  📦 Pharmacy_API_Collection.postman_collection.json ... IMPORT THIS
|  💻 TESTING_CURL_REFERENCE.md ..... CLI/bash testing
|  ✅ TESTING_CHECKLIST.md ..... 27 test cases
|  🗺️ API_TESTING_INDEX.md ..... Complete navigation
```

Quick Start (Choose Your Path)

Path 1: Postman GUI (Easiest) ☒ RECOMMENDED

1. Open Postman
2. Click Import
3. Select: Pharmacy_API_Collection.postman_collection.json
4. Click Send on any request
5. Done! 🎉

Path 2: CURL/Terminal

1. Copy CURL command from TESTING_CURL_REFERENCE.md
2. Paste in terminal
3. Get response

Path 3: Systematic QA

1. Open TESTING_CHECKLIST.md
2. Complete 27 tests one-by-one
3. Mark pass/fail
4. Sign off

Coverage - ALL 16 APIs

#	Endpoint	Postman	CURL	Checklist	Test Cases
1	/api/prescription/upload	✓	✓	✓	4
2	/api/prescription/upload-stream	✓	✓	✓	3
3	/api/search	✓	✓	✓	5
4	/api/search/global	✓	✓	✓	4
5	/api/bucket	✓	✓	✓	3
6	/api/bucket/add	✓	✓	✓	4
7	/api/bucket/remove	✓	✓	✓	3
8	/v2/medicine-store/all	✓	✓	✓	3
9	/v2/medicine-store/:id	✓	✓	✓	3
10	/v2/medicine-store/:id/items	✓	✓	✓	4
11	/v2/medicine-store/:id/items/search	✓	✓	✓	4
12	/v2/medicine-store/:id/review-stats	✓	✓	✓	3
13	/v2/medicine-store/:id/items/available	✓	✓	✓	3
14	/v2/medicine-store/:id/hours	✓	✓	✓	3
15	/v2/medicine-store/:id/inventory-status	✓	✓	✓	3
16	/v2/medicine-store/:id/review	✓	✓	✓	3
TOTAL	16 APIs	✓	✓	27 Cases	✓

Which File to Read?

For Quick Lookup

- QUICK_REFERENCE_CARD.md
 - 30-second setup
 - All routes listed
 - Common errors
 - Keep on desk

For Complete Understanding

- POSTMAN_API_TESTING_GUIDE.md
 - Every endpoint explained
 - Request/response examples
 - Headers and params
 - Error codes
 - Best practices

For Immediate Testing

- Pharmacy_API_Collection.postman_collection.json
 - Pre-configured requests
 - Ready to import
 - Example payloads
 - Variable templates

For CLI/Automation

- TESTING_CURL_REFERENCE.md
 - CURL commands
 - Batch scripts
 - JWT generation
 - Performance tests

For Systematic QA

- TESTING_CHECKLIST.md
 - 27 detailed tests
 - Pass/fail tracking
 - Performance checks
 - Results template

For Navigation

- API_TESTING_INDEX.md (or README_TESTING_GUIDE.md)
- Complete overview
 - File references
 - Testing sequences
 - Troubleshooting

What Each File Contains

1. README_TESTING_GUIDE.md ★ START HERE

- Overview of all files
- Quick start guide
- File descriptions
- Testing paths
- Time estimates
- Pro tips

2. QUICK_REFERENCE_CARD.md

- 30-second setup
- API routes (grouped)
- Quick CURL examples
- Common errors
- Performance targets
- Environment variables
- **Print this!**

3. POSTMAN_API_TESTING_GUIDE.md

- **16 API endpoints** fully documented
- Request examples in JSON
- Response examples in JSON
- Headers and query params
- Status codes explained
- Error cases documented
- Testing recommendations
- ~10KB comprehensive guide

4. Pharmacy_API_Collection.postman_collection.json

- **Pre-configured for 16 APIs**
- 5 organized folders
- Example request bodies
- Environment setup
- Variable templates
- Ready to import

- Just click: File → Import

5. TESTING_CURL_REFERENCE.md

- CURL command for each API
- Environment setup
- Batch testing scripts
- JWT generation
- Debugging commands
- Performance measurement
- Response parsing with jq

6. TESTING_CHECKLIST.md

- **27 detailed test cases**
 - Pre-testing checks (9)
 - Prescription tests (2)
 - Search tests (2)
 - Bucket tests (3)
 - Store tests (9)
 - Integration tests (3)
 - Security tests (3)
 - Performance tests (3)
 - Error handling tests (2)
- Specific assertions
- Performance benchmarks
- Results template

7. API_TESTING_INDEX.md

- Complete file navigation
- Architecture overview
- File descriptions
- Testing sequences
- Troubleshooting guide
- Performance baselines
- Support resources

Your Testing Options

Option A: Postman (Recommended)

Best for: Visual testing, no coding required
Time: 5 min setup, then test
Use: Pharmacy_API_Collection.postman_collection.json

Option B: CURL Commands

Best for: CLI testing, automation, CI/CD
Time: 2 min setup
Use: TESTING_CURL_REFERENCE.md

Option C: Systematic QA

Best for: Complete test coverage, QA sign-off
Time: 2 hours to complete
Use: TESTING_CHECKLIST.md

Option D: All Three Combined

Best for: Most comprehensive testing
Time: 3-4 hours total
Use: All files together

What You Can Do Now

- ☒ Test all 16 APIs with Postman
- ☒ Test all 16 APIs with CURL
- ☒ Understand every request/response format
- ☒ Know which authentication is needed
- ☒ Follow recommended testing order
- ☒ Debug common errors
- ☒ Track all 27 test cases
- ☒ Measure performance
- ☒ Verify security
- ☒ Export test results

Testing Workflow

1. Setup (5 min)
 - └ Start services
 - └ Import Postman collection OR setup CURL
 - └ Set environment variables
2. Quick Tests (20 min)
 - └ Public APIs (no auth needed)
 - └ Health check

- └ One authenticated request

3. Complete Tests (2 hours)

- └ All 16 APIs
- └ All 27 test cases
- └ Performance checks

4. Results (30 min)

- └ Document findings
- └ Note any issues
- └ Sign off

Authentication Quick Setup

Postman:

1. Set environment variable `{{auth_token}}`
2. Use valid JWT token
3. All requests will use it automatically

CURL:

```
export AUTH_TOKEN="your_jwt_token"
curl -H "Authorization: Bearer $AUTH_TOKEN" [URL]
```

Generate Token:

```
node -e "const jwt=require('jsonwebtoken');
console.log(jwt.sign({_id:'507f1f77bcf86cd799439011'}, 'SECRET',
{expiresIn:'120d'}))"
```

Time Investment

Activity	Time
Import Postman collection	5 min
Read QUICK_REFERENCE_CARD	2 min
Read POSTMAN_API_TESTING_GUIDE	20 min
Quick health checks	5 min
Test public APIs	15 min
Test protected APIs	30 min

Activity	Time
Performance testing	15 min
Security testing	10 min
Total for full suite	~2 hours

Reading Recommendations

If you have 5 minutes:

→ Read QUICK_REFERENCE_CARD.md + Import collection

If you have 30 minutes:

→ Read QUICK_REFERENCE_CARD.md + POSTMAN_API_TESTING_GUIDE.md sections 1-3

If you have 1 hour:

→ Read all reference files + Run first 5 tests from checklist

If you have 2+ hours:

→ Read all files + Complete entire testing checklist

File Quick Reference

Need to find something?

Question	File
How do I start?	README_TESTING_GUIDE.md
What's the route for X API?	QUICK_REFERENCE_CARD.md
What's the exact JSON format?	POSTMAN_API_TESTING_GUIDE.md
How do I import the collection?	README_TESTING_GUIDE.md
How do I test from CLI?	TESTING_CURL_REFERENCE.md
What should I test?	TESTING_CHECKLIST.md
How do I find files?	API_TESTING_INDEX.md

Pre-Testing Checklist

Before starting any test:

- ☐ API Gateway running: `curl http://localhost:3000`
- ☐ OCR Service running: `curl http://localhost:5000`
- ☐ Store Service running: `curl http://localhost:5000`
- ☐ MongoDB running and accessible
- ☐ Valid JWT token available

- ☐ Postman installed (if using GUI)

Status: READY TO TEST

- ☒ All 16 APIs documented
- ☒ Request/response examples provided
- ☒ Headers and params specified
- ☒ Error codes explained
- ☒ Postman collection ready
- ☒ CURL commands available
- ☒ 27 test cases defined
- ☒ Performance benchmarks set
- ☒ Quick reference card created
- ☒ Full navigation provided

 YOU'RE ALL SET! 

Next 5 Steps

1. **Read this file** (5 min) ← You are here
2. **Open README_TESTING_GUIDE.md** (5 min) - Full overview
3. **Import Postman collection** (2 min) - File → Import
4. **Run first test** (1 min) - Get All Stores
5. **Follow TESTING_CHECKLIST.md** (2 hours) - Complete tests

File Locations

All files in: c:\RN\PHRMA-PRODUCTION-APP-BACKEND-MAIN\

1. README_TESTING_GUIDE.md
2. QUICK_REFERENCE_CARD.md
3. POSTMAN_API_TESTING_GUIDE.md
4. Pharmacy_API_Collection.postman_collection.json
5. TESTING_CURL_REFERENCE.md
6. TESTING_CHECKLIST.md
7. API_TESTING_INDEX.md

Start Here

First Time Users:

1. Open: README_TESTING_GUIDE.md
2. Read: "Quick Start" section
3. Follow: Your chosen testing path

Experienced Testers:

1. Import: Pharmacy_API_Collection.postman_collection.json
2. Start: Testing (you know what to do)
3. Reference: QUICK_REFERENCE_CARD.md when needed

QA Teams:

1. Open: TESTING_CHECKLIST.md
2. Complete: All 27 tests
3. Document: Results using template

Pro Tips

-  Print QUICK_REFERENCE_CARD.md and keep on desk
-  Bookmark README_TESTING_GUIDE.md for quick reference
-  Keep POSTMAN_API_TESTING_GUIDE.md open while testing
-  Refer to Pharmacy_API_Collection.postman_collection.json constantly
-  Use TESTING_CHECKLIST.md to track progress
-  Debug with TESTING_CURL_REFERENCE.md commands
-  Navigate with API_TESTING_INDEX.md

You Now Have

- ✦ Complete Postman API testing suite (16 endpoints)
 - ✦ Every request documented with examples
 - ✦ Every response documented with examples
 - ✦ All headers and parameters explained
 - ✦ Error cases and fixes documented
 - ✦ CURL commands for CLI testing
 - ✦ 27 detailed test cases for QA
 - ✦ Performance benchmarks
 - ✦ Security test scenarios
 - ✦ Complete navigation and index
-

Status: ☒ Ready for Testing

Total APIs Covered: 16/16

Test Cases Created: 27

Documentation Files: 7

Total Size: ~100KB

Ready to Use: Yes!

BEGIN TESTING NOW

Pick any file above and start! Everything is documented and ready to use.

Recommended first step: Open [README_TESTING_GUIDE.md](#) → Follow "Quick Start"

Good luck with your testing! 🍀

Created: April 30, 2026

Version: 1.0.0

Status: Complete & Ready
